**TISSUE SALTS
FOR ANIMALS
-WORKSHOP-**

Workshop Includes:

A theory section

- The benefits of using Tissue Salts for Animals
- Causes of mineral deficiencies in animals
- What each mineral is used for
- Visual and Psychological signs and symptoms of deficiencies
- Dosage and administering of minerals to animals
- Comprehensive course manual

This is followed by a hands-on demonstration involving an assessment of a dog and a horse, and designing a treatment protocol for each of the animals

This workshop attracts 7 CPE points

Presented by:

The Institute of Biochemic Medicine (Asia Pacific)

Presenter

Sue Bradtke

- Biochemic Medicine Practitioner
- 30+ years' experience with horses. Competed in Eventing and show jumping
- Career as a Bowen and Emmett therapist for horses, small animals and people for the past 12 years

My passion for healing animals was guided to the next level to explore the Schüssler Tissue Salts to compliment my natural therapies.

Success stories include: relief from Colic in horses, anxiety and hyperactivity reduction in dogs, calmness, concentration and recovery of competition horses.

The Institute of Biochemic Medicine (Asia Pacific) conducts the following course on behalf of the Biochemischer Bund Deutschland e.V (BBD) – German Association of Biochemistry – founded in 1885 and the European Institute for Biochemistry.

The Clinical Science of Biochemic Therapy accorded to Dr. Schüssler is a scientifically proven, evidence based therapy widely practised in European countries, and is a Continuing Education Module for: Doctors, Dentists, Chemists and Veterinary Surgeons in the EU.

The Clinical Science of Biochemic Therapy – Diploma Course – 4 day full time workshop

- Physiological role of minerals
- Twelve Schüssler minerals
- Cation/Anion bonding pairs
- Absorption
- Deficiencies & causes
- Drug induced nutrient depletion
- All aspects of the use of mineral tissue salts in accordance with Dr. Schüssler
- Brief introduction to the treatment of animals

For more information on the Diploma Course please contact:
