

The Clinical Science of Biochemic Medicine

Dr. (med) W.H. Schüssler

The Institute of Biochemic Medicine (Asia Pacific)

Conducts the following workshops/courses on behalf of the Biochemischer Bund Deutschland e.V. (BBD) – German Association of Biochemistry – founded in 1885, and the European Institute for Biochemistry of Dr. Schüssler

➤ **The Clinical Science of Biochemic Therapy Incorporating Facial Diagnostics**

- Physiological role of minerals
- Twelve Schüssler minerals
- Cation/Anion bonding pairs
- Absorption
- Deficiencies & causes
- Drug induced nutrient depletion
- All aspects of the use of mineral tissue salts in accordance with Dr. Schüssler
- Brief introduction to the treatment of animals
- An introduction to the biochemic healing methods in accordance with the documented studies of Dr. Schüssler, relating to the facial psychological signs, visible at the onset of mineral deficiencies – subsequently proven by Dr. Kurt Hicethier in the 20th century
- Introduction to the Supplementary Remedies #13 - 27

The Clinical Science of Biochemic Therapy, accorded to Dr. Schüssler, is a scientifically proven, evidence based therapy and a Continuing Education Module for: Doctors, Dentists, Chemists and Veterinary Surgeons and associated modalities in the EU.

The Clinical Science of Biochemic Therapy includes:

The Basic Principles

The foundation of Biochemistry was laid more than a century ago by Rudolph Virchow, one of the foremost scientists of the day. He discovered that the human body is composed of an enormous number of tiny, living cells. Each cell is made up of an infinitesimal but perfectly balanced quantity of three classes of materials – water, organic substances and inorganic substances. Water and organic matter such as sugar, albuminous and fatty substances make up the greater portion of the body. The inorganic (mineral) elements, although present in much smaller quantities are the really vital elements. They are the active workers which utilize the inactive substances in building the millions of cells that the body is composed of. The life of these cells is of short duration – millions are constantly breaking down and new ones are just as rapidly being built up, providing there is a constant supply of the necessary material for this continuous rebuilding process.

Dr. Schüssler's Therapy

Dr. Schüssler determined that these inorganic substances are present in the body as compounds (mineral salts) and named twelve principal compounds which he called "tissue salts". He defined the types of disease (symptoms) arising from a deficiency of each tissue salt. With this knowledge he was able to prescribe with great accuracy and effect. Dr. Schüssler studied the function of each of the twelve tissue salts and was able to define the type of disorder caused by the disturbance of the physiological balance of each tissue salt.

The five proven principles of Dr. Schüssler Biochemistry:

1. Disease does not occur if cell metabolism is normal
2. Cell metabolism is in turn normal if cell nutrition is adequate
3. Nutritional substances are either of an organic or inorganic nature where the body is concerned
4. The ability of the body cells to assimilate and to excrete and further to utilize nutritional material is impaired if there is a deficiency in the inorganic minerals constituents of cellular tissues
5. Adequate cell nutrition may be restored and cellular metabolism normalized by supplying the required tissue salts to the organism in an easily assimilated form.

Facial Diagnostic includes:

In depth facial diagnostic skills, interpreting facial signs including lines, shadows and shines, psychological signs, in accordance with the evidence based proven and recognised methods of the German School of Facial Diagnostics.

Course Outcome:

- Thorough understanding of the 12 minerals
- Signs and symptoms of mineral deficiencies
- The wide ranging fields of application
- Methods of administration
- Indications – Contraindications
- Knowledge regarding Sulphates as biocatalysts
- Drug induced mineral depletion
- Detoxification, Pregnancy, Female disorders, etc.
- Facial diagnostics: 'Tool' to assist diagnosis with the ability to recognise mineral deficiencies, assisting in the confirmation of physical and psychological signs & symptoms
- An understanding of the use of Supplementary Minerals 13-27

Presented by
Alex Sutton
B.Sc., B.A., B.Bus. B.App.Sci

Biochemist: Practicing the Clinical Science of Biochemic Therapy – in accordance with the teachings of Dr. Schüssler and the principles and policies of the *Biochemischer Bund Deutschland* (German Association of Biochemistry (BBD) – and *The European Institute of Biochemistry*.

Alex studied biochemistry both in the United Kingdom and Germany, specialising in the area of “inorganic elements” after working for many years in Germany at the request of the BBD (German Association of Biochemistry) he took up appointment as Chairperson of the Asia Pacific branch of the BBD

Alex lectures extensively throughout the world and is highly regarded as one of the foremost experts on the subject of inorganic biochemistry and the works of Dr. Schüssler. Conducting private clinics throughout the Asia Pacific Region, Scandinavia, EU, UK and UAE.

Appointments:

- ✓ Representative Consultant for the Asia Pacific Region on behalf of the European Institute of Biochemistry

International Institute of Complementary Therapists

DETAILS

The Clinical Science of Biochemic Therapy
incorporating *Facial Diagnostics* Seminar
\$700

Students attending upgrade or revision, an administrative fee of **\$25** per day applies

‘The Clinical Science of Biochemic Therapy’ Course incorporating Facial Diagnostics is a prerequisite to all other workshops and can either be undertaken via correspondence or attendance at course venue.

BOOK EARLY, BOOK NOW!
AVOID DISAPPOINTMENT AS PLACES ARE LIMITED

DATES 8, 9, 10, 11 JUNE 2018

VENUE Taylor Range Country Club
28 Greenlanes Road
Ashgrove QLD 4060

IMPORTANT INFORMATION

- Lectures are daily from 9 am to 5 pm
- ‘The Clinical Science of Biochemic Therapy’, examination of 2 hours duration will take place on the final day – commencing at 1 pm
- All text books will be supplied. Students need to bring personal note books and writing implements.
- Morning and afternoon tea will be provided
- Lunch: A variety of restaurants and/or take-a-ways are located less than 10 minutes away

For further information please view our web site at:
